

Team member working student (f/m/d) wanted

Remote, up to 20h, Pay according to performance & qualification

Do you want to help shape the future of forestry and drive the digital transformation of the forests? Is innovation not just a word for you, but your passion?

Tasks

- Conducting product and market research
- Data processing and digitalisation of customer data
- Preparation & participation in workshops
- Supporting the team with daily tasks
- Testing & handling various new forestry applications
- Other matching the skills you bring!

Requirements

We are looking for someone who is interested in digitalisation and wants to think outside the box of traditional forestry. To help our customers in the best possible way, we are always on the lookout for new applications. Ideally, you will be familiar with GIS/QGIS. We will be happy to teach you everything else.

Vision & Mission

As a forestry and digital consultancy, our goal is to shape a sustainable future for forestry by utilising innovative technologies and digital solutions.

We support forest owners and foresters in managing their forests optimally and efficiently. At the same time, we conserve both natural and operational resources.

"Only dead fish swim with the current"
